DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "rubber shroud" (claim 2) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filling date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

- 2. The specification is objected to because of the following informalities:
 - There are no proper headings such as "Background of Invention", "Brief Summary of the Invention", "Brief Description of the Invention", "Detailed Description of the Invention", etc.

Claim Objections

3. Claims 4-10 are objected to under 37 CFR 1.75(c) as being in improper form because multiple dependent claims 4-10 are dependent on multiple dependent claims 3-10. A multiple dependent claim cannot be dependent on another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-10 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 5. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - Claim 1 recites the limitations "its inside" (line 6) and "the contact" (line 10), which lack antecedent bases.
 - Claim 1 claims "and in that it is held inside said bore" (claim 1, line 9); it is unclear to which structure "that" and "it" are referring.
 - Claim 3 recites the limitation "the area" (line 17), which lacks antecedent basis.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless – (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/575,591

Art Unit: 3732

7. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Lustig (4268252).

Lustig discloses a dental handpiece comprising: a handle/housing 10, a head area 66, a neck area located between handle 10 and head area 66, a drive shaft 12 within the handpiece, and a tool 34 is disposed in a bore/tool chamber 16 inside head area 66; said tool is held by contact with said drive shaft via gear teeth 30 and gear hub 35 (Figs. 1, 3; column 2 line 62 – column 3 line 32). Lugtig additionally discloses a spring 56 in the area of the handle/housing 10 (Fig. 8).

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lustig (4268252) in view of Verge (3602070).

Lustig discloses a dental handpiece as claimed substantially as discussed above.

However, Lustig fails to disclose the drive shaft being surrounded by a rubber shroud.

Verge discloses a rotary-to-rotary transmission comprising: a drive shaft 54 having rubber gear rollers 62 in order to obtain effective friction. It would have been obvious to one having ordinary skill in the art at the time the invention was made to

Application/Control Number: 10/575,591

Page 5

Art Unit: 3732

modify Lustig by including rubber gear rollers so that a high coefficient of friction can be obtained ensuring effective rotation of the drive shaft.

Conclusions

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hao D. Mai whose telephone number is (571) 270-3002. The examiner can normally be reached on Monday-Friday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cris Rodriguez can be reached on (571) 272-4964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
- 12. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
